

# Snell's law

## Fermat law

Principle of least time — path taken by a ray between two given points is the path that can be traversed in the least time.

## Snell's law

Snell's law (Snell–Descartes law, the law of refraction)

$v_1$

$v_2$

$$\frac{\sin i_1}{\sin i_2} = \frac{v_1}{v_2}$$

$$\frac{\sin i_1}{\sin i'_2} = \frac{v_1}{v_2};$$

$$\frac{\sin i_1}{\sin i'_2} = \frac{v_1}{v_2};$$

$$\frac{\sin i_1}{\sin i'_2} = \frac{v_1}{v_2}; \quad \frac{\sin i_2}{\sin i'_2} = \frac{r_1}{r_2};$$

$$\frac{\sin i_1}{\sin i'_2} = \frac{v_1}{v_2};$$

$$\frac{\sin i_2}{\sin i'_2} = \frac{r_1}{r_2};$$

$$\frac{r_1 \sin i_1}{v_1} = \frac{r_2 \sin i_2}{v_2}$$

## Radius equation

$$\frac{r \sin i}{v} = \text{const}$$
